

Stride — Manual UAT Checklist

Page-by-page verification for localhost / demo environment
Tick Pass · Fail · N/A and record issues in the notes column.

Document version	2026-07-08 (generated from app nav catalog)
Environment	http://localhost:3000 — local PostgreSQL recommended
Primary login	demo@demo.imara.co.ke / Demo@2026!
HR login	hr@swiftfreight.imara.co.ke (per active vertical)
Finance login	finance@swiftfreight.imara.co.ke
ESS login	moses.okello@swiftfreight.imara.co.ke → /ess/login
Tester name	
Test date	
Build / branch	

How to use this document

1. Work module-by-module using the module switcher (top bar) or sidebar.
 2. For each page: confirm it loads without console errors, shows sensible demo data, and primary actions work.
 3. Mark **Pass** if acceptable for demo/client UAT; **Fail** if broken; **N/A** if not licensed or not applicable.
 4. Log every Fail in the notes column and in the Issue Log (last section).
 5. Compare against **Known platform gaps** — some items are expected limitations, not bugs.

 Production-ready target

Partial

 Some gaps expected

Planned

 Roadmap / shell UI

Critical end-to-end flows

Complete these first — they cover the main sales demo story.

Done	Flow	Issues
☐	Login & session Resolve email → password → dashboard loads with modules & overview KPIs (< 3s local DB)	
☐	Entity switcher Switch each vertical context — data/branding scopes correctly (6 sectors if multi-vertical seed)	
☐	Add employee People → Employees → Add employee → save → appears in list	
☐	Import / export Download template dropdown visible → download → import Excel (optional)	
☐	Leave approval Leave hub → pending queue → approve/reject → balance updates	
☐	Payroll run Payroll runs → validate → generate → review → approve → payslip PDF	
☐	M-Pesa disbursements Disbursements → select approved month → sandbox batch → poll status	
☐	Recruitment Job opening → application in pipeline → schedule interview	
☐	Onboarding workflow Start onboarding for employee → tasks appear for HR role	
☐	Finance invoice Create invoice → PDF preview → record receipt (if seeded)	
☐	Fleet trip Fleet → trips/orders → open trip → compliance/docs visible	
☐	ESS employee ESS login → payslips → leave request → profile	

Vertical entity switcher (multi-sector demo)

Test each context from the top-bar company switcher after `demo:reseed:all-verticals`.

Done	Entity	Issues
☐	Heritage Members SACCO Ltd (imara-sacco__ke)	
☐	Northline Kenya Ltd (petroleum-retail__ke)	
☐	SwiftFreight East Africa Ltd (cargo-logistics__ke)	
☐	Amani Medical Centre (hospital-healthcare__ke)	
☐	Horizon Travels Ltd (travel-agency__ke)	
☐	Kilimani Builders Ltd (construction__ke)

Cross-cutting checks (all modules)

Done	Check	Issues
☐	No JavaScript console errors on primary pages	
☐	No infinite loading spinners / blank screens	
☐	Dates & currency show Africa/Nairobi + KES correctly	
☐	Role-based access: HR vs Finance vs Admin see appropriate actions	
☐	Search (🔍) finds people, payroll, departments	
☐	Import/export dropdowns not clipped by headers	
☐	Mobile sidebar opens/closes on narrow viewport	
☐	Logout and re-login works cleanly	
☐	Dark mode toggle works (if enabled)	
☐	PDF downloads open correctly (payslips, invoices)	

Known platform gaps (expected — not necessarily bugs)

Use this when deciding Pass vs "missing for a full business platform".

Area	Expected limitation / missing capability	Affects us?
General ledger & full accounting	Finance module is AR/AP focused — not a full ERP GL.	☐
Multi-currency consolidation	Entity switcher supports KE/UG; group consolidation is limited.	☐
Projects module	Marked planned — expect roadmap UI, not full PM suite.	☐
SACCO / Healthcare / Energy verticals	Vertical packs are planned/partial — sector pages may be shells.	☐
Procurement GRN & 3-way match	PR → LPO exists; full procure-to-pay may be incomplete.	☐
Sales CRM depth	Pipeline KPIs partial — not a full Salesforce replacement.	☐
Native mobile apps	ESS is PWA/web — no iOS/Android store apps.	☐
Biometric hardware	Device integration seeded for demo; production device sync varies by vendor.	☐
Control plane (billing)	Client provisioning, Paystack dunning — separate internal surface.	☐
SSO / Microsoft / Google	Only shown when configured per org — not default in local demo.	☐
Real M-Pesa / KRA live APIs	Sandbox/disbursement simulation in demo — not production tax filing.	☐
Workflow builder	Onboarding uses templates — custom workflow designer is limited.	☐
Document OCR / e-sign	Document storage exists; advanced e-sign integrations may be missing.	☐
Inventory / warehouse WMS	Fleet & assets cover logistics ops — not full WMS.	☐
Helpdesk / ITSM	No dedicated ticketing module — use tasks/onboarding/discipline.	☐
